DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 and 7-15, drawn to a computer-readable medium having instructions recorded thereon to carry out the steps of transmitting input speech command and speech recognition grammars to a remote speech recognition system, classified in class 704, subclass 270.1.
 - II. Claims 16-19, drawn to a computer readable medium having a markup language for execution on a client device in a client/server system, classified in class 704, subclass 270.
2. Inventions of group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention of group I does not require the specific markup language instructions to unify all the system events, such as input/out interface other applications. The subcombination has separate utility such as controlling dialogues between user and machine in voice interactive response system.

Art Unit: 2655

3. A telephone call was made to applicant's attorney, Mr. Steven M. Koehler on 5/17/2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
